KNOWLEDGE EXCHANGE CONFERENCE

human landscape

to regenerate a memorable urban soul of human landscape where the **indigenous landscape** the **local culture** of the territory, the pre-empt **human nature** can take their own forms of expression.

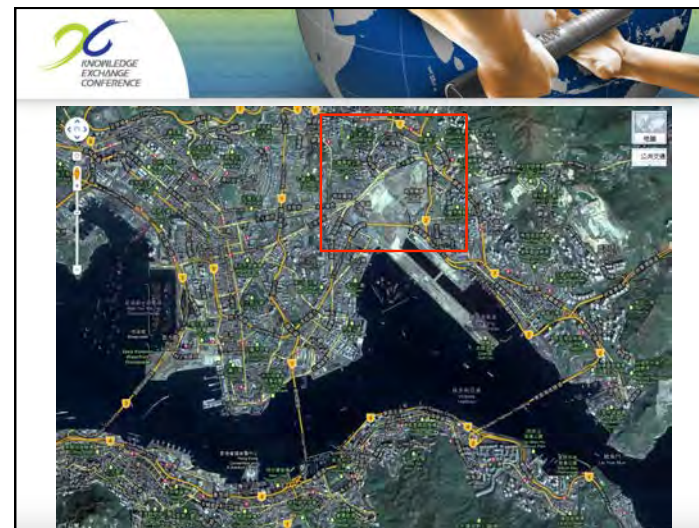

KNOWLEDGE EXCHANGE CONFERENCE

Question
 How to preserve, regenerate and use historical resources under the economic development pressure?
 How to investigate scientifically urban climate in relationship with building density and design?
 How to integrate religious and green corridors into the overall civil construction?

Solution
 Integrating culture and economics to support future development, using local conditions of cultural resources, creating job opportunities and improving urban spaces.

Connection of History and local cultures
Heritage Trails linking historical landmarks, old and new communities connected via the river and pathways

Multi-dimensional tourism and economy
Creating clusters of tourist attractions, promoting marketplaces for small and local businesses

**Design Together
Construct Together
Enjoy Together**
Enhancing an inclusive community, Building a sense of place, Embracing a civil spirit

KS:

How to relate and respond to the environment?

How to present new ways of looking at the world around us?

- Aesthetic of **Sustainability**
- **Living Dialogue** with River
- Contemporary **Art & Culture** Perspective
